Subject: Re: Bazzard-1 Abandonment Program

Mark

I have reviewed the programme and have no issue with the plug and abandonment programme for the Bazzard-1 well. I have also discussed this with Terry McKinley, delegate to the DA and he has agreed with the assessment.

As such, Stuart through ADA can commence the P&A operations and carry out the P&A as per the programme submitted with your email. A formal Delegate's signed letter will be sent later. This email is to convey that approval.

Please call me if there is any further clarification required.

Regards

David

Subj: Bazzard-1 Abandonment Program
ect

Terry,

It is proposed to TD Bazzard-1 today at 3450m RT and then commence abandonment operations.

Please find attached for your approval the proposed abandonment program.

As the rig will be ready to run in the hole to set abandonment plugs later tonight, it would be appreciated if you could provide an approval by email this afternoon.

<<Bazzard-1 Abandonment Program Rev 1 (Gov).doc>>

Note that this version does not contain the cement program itself, but this will be included in the version sent to the rig.

We note from our discussion with David Wong your requirement for a seabed survey and this step is included in the program.

A copy of the vision from the ROV will be made available to you.

In the meantime, please do not hesitate to contact us if there are any queries.

If there are any technical questions regarding the program, please refer these to Rob Oliver at ADA (03-8610 3038).

Many thanks and regards,

Mark Mussared
