

-  = fine grained skeletal limestones.
-  = marly limestone with bryozoal fragments.
-  = marly limestone with sponge spirules.
-  = pelagic limestone with detrital element.
-  = pelagic limestone.
-  = "Globigerinid ooze."
-  = initial Oligocene detrital sands & silts.
-  = shallow water sandy bryozoal calcarenite Clifton Formation
-  = transport directions of detrital material.
-  = unconformity See Fig. 3-A.
