CHEMICAL ANALYSES (OIL, WATER, GAS.)

Analyses by Mines Dept.

1310 – 1350. :- Dark brown to black crude oil of S.G. 0.92 to 0.93 - "heavy crude oil free from gasoline, kerosene, & other light fractions, of a mixed paraffinic - asphaltic base.

5635 – 5640 Dark brown crude oil of S.G. 0.97. Crude oil containing approx 20% of light low b.p. fractions, and is of mixed paraffinic - asphaltic base of softening point 40°-50° C. and contains some sulphur.

Shows.
Oil 980-1000 - Slight.
1310'
1500'
1966-1980' Tr of very dark brown Oil
2493-2511' " " " show oil.

Gas. 980'-1000'.
3104' gas continuously.
3170' Large flow of gas when in sandstone.
5022'-5032'
5235'-5266'
5120'-5290' Small show light oil + Paraffin.
5351-5600 Intg. Oil show throughout.
5704-5713 Show of oil.

GENERAL (Conclusions, structure, abandonment programme, etc)
