COMMENTS:

Note: If highest or lowest data is a 3 or 4, then an alternate 0, 1, 2 highest or lowest data will be filled in if control is available.

If a sample cannot be interpreted to be one zone, as apart from the other, no entry should be made:

- 0 S/C or Core - Complete assemblage (very high confidence).
- 1 S/C or Core - Almost complete assemblage (high confidence).
- 2 S/C or Core - Close to zone change but able to interpret (low confidence).
- 3 Cuttings - Complete assemblage (low confidence).
- 4 Cuttings - Incomplete assemblage, next to uninterpretable or S/C with depth suspicion (very low confidence).
