

2-98 Anemone 1A

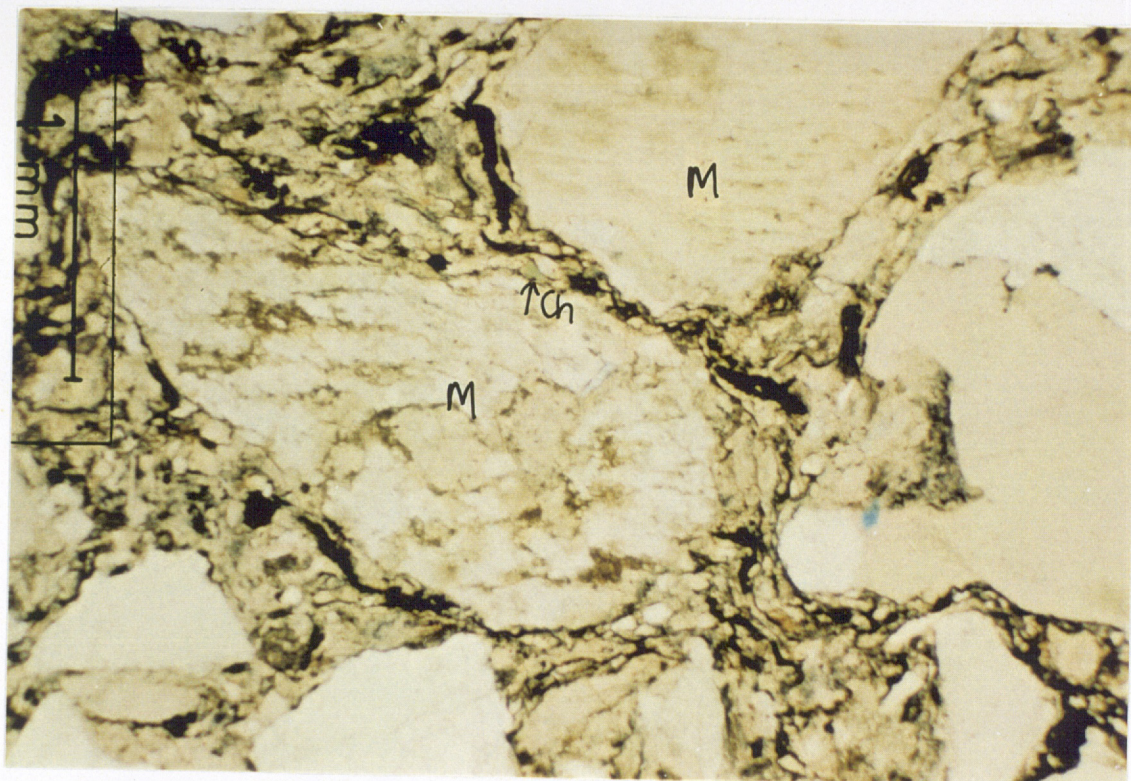

Figure 9 - Anemone #1A, junk sub sample, 4676a m. Thin section micrograph in plane polarized light showing alteration of microcline (M) and a plutonic fragment on the right. Stylolitic organic matter and fine pyrite pervade the matrix. A small lime green area of chlorite (Ch) is visible. Vague bluish areas in the matrix may be microporosity.
