Figure 9: SWC 22, 2945m, 2mm, PPL
Thin bed of opaques (O) and very fine-grained carbonate (A). The opaque grain marked shows a finely punctate texture.

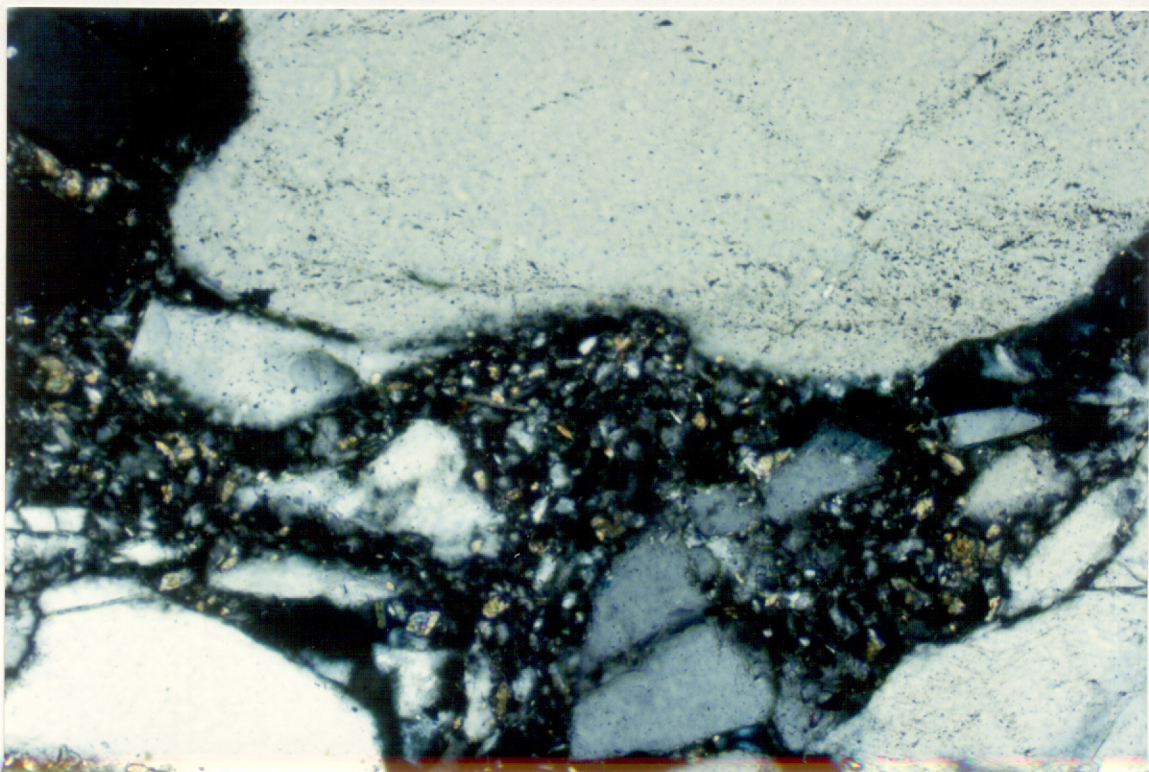

Figure 10: SWC 24, 2908m, 0.2mm, CL
This high-magnification photomicrograph shows the homogeneous material regarded as matrix; small chips of quartz and of carbonate can be seen in a dark matrix of clay (?kaolinite).
