Stop Card of the Week

28 May 2006

ANZON stop card of the week winner is Terence Nevin who, using the Stop observation techniques, observed an electrical drop light with exposed wires in the lead during a pre-job equipment inspection. Terence cut the lead at the exposed wires then took the light and lead to the rig electrician for repair. Thanks to Terence for using the Stop philosophy during his everyday work and making sure his equipment and work area was in a safe condition before starting the job.

“Nobody gets Hurt”!
